### TUESDAY, APBIL 11, 1803.

on in the 'brokerage committee" and that The members of the State Committee seem to be of the opinion that for a hired man Morton is altogether too unanimous. Some of his recommendations have been stepped upon by the committee, who inset that he has acted without authority.

Chief the the black of the black of the the black of the the black of the the black of the black o This rupture in the "brokerage commit-tee" will please a good many of the faithful, whose hatred of the bogus Colonel is only exceeded by their desire for office.

At the parish meeting of the First Congregational Church last evening it was of the death-rate in several cities for the voted to sell the lot of land desired as a year 1892. Here it is: Chicago, 18.2; location for the proposed new public II. Philladelphia, 21.1; Brooklyn 21.9; Baltibrary building in case the heirs are will-more, 23.2; Boston, 23.9; New York, 24. ing to waive the terms of the will, which In view of this comparative record our provided that the land should be used for Philadelphia contemporary is justified, no other purpose than that originally intended. I is understood that the heirs "What carthly need is there that the are willing to meet the question in a liber- death-rate of New York should be 25 per al spirit at d waive this condition of the cent higher than that of Chicago? Drainwill. The indications, therefore, are fg- age, ett., considered, the reverse should vorable for the construction of a library be the case. The fact proves that building that will be both an ornament about 10,000 people die unnecessarily-

The New York World is authority for the statement that Headsman' Bissell and his first assistant are among "the leading advocates and most earnest supporters of civil service reform in the country." The made such a raid upor the fourth-class trifles, has threatened to say some very severe things if this lively distribution of the spoils is continued. If the World does not succeed in its amusing efforts to get into the good graces of the administration, the failure will not be due to any lack of adulation on its part.

Senator Vest, who was appointed as sub-committee to consider the nomi-uation of Eckles, now pending before the Finance Committee, called upon the President and informed him that the opposition to this nomination is very ronouved, but the only effect of his statement was to make the Pies-ident angry. Even if it is admitted that Mr. Cleveland was ignorant of Eckles unfitness for the position when he seleated Price 101 1-2 and Interest. him, he is well aware of the fact now and there is no excuse for keeping his name before the Senate, unless it is that the I'resident would rather place this Inexperienced young man in the office of Comptroller of the Currency than to recognize any opposition to his sweet will. The Senate should reject the nomination.

Plain Facts from a Tin Plate Factory.

The N. & G. Taylor Company, of Philadelph a, wri es us: "Our tin plate works in I'b ladelph is were erected during last year. In them we are now turning out American til plate at the rate of a compiete furshed society minute, and of better quality and finish than we have received from Great Britain for many years. "To those newspaper publishers who draws like have endeavored to prevent the establish-

ment of this great industry in this country we can only say that their action must be based upon entire ignorance of the John Cassidn,

President:

President: trade, or a desire to gain political notor-icly, for we do not believe the man exists who, with a clear knowledge of the indus try, will honestly contend it is one that could not be carried on in America with the same success as thousands of others. "There is nothing mysterious about the manufacture of tin plate. It is simply

sheet iron or soft sheet steel, properly prepared and coated with pure tin for utensils, or a mixture of tin and lead for roofing purposes. His value is regulated by the quality and thickness of the iron or steel, the quality and quantity of the untal coating used, and the manner in which the finished plate is made.

"The value of American tin plates,

therefore, con ists in the value of Americat sheet iron or strel, the cost of the coating and the labor of combining the same. If America should purchase her tin plate in Great Britain, she would close her industries and get all the sheet iron and steel used in tin plates from the saide source. The superiority of the American product has been quickly and fully appreciated by the tin plate workers, who now give it the preference, and thereby have created a demand which has caused the output of American tin plate to increase to such an extent that the sworn returns of the manufacturers for the three months ending December 31, 1892, show an increase of the hundred Street Railway Locations. and twenty-right per cent, over the first three months after the industry storted, and an increase of righty per cent. over the three months ending September 30, 1892, and each succeeding quarter is likely to exhibit great progress in this important industry."

Report of an English Commission. The editor of the London Lancet, best known of all British medical journals, and perhaps most widely read of all medical journals, recertly sent a commission of

experts to examine the quality and quantity of the water supply of Chicago, and also to investigate the drainage and other sanitary appliances of the city. The report of the commission has been made public, and, as was inevitable to an honest and intelligently framed report, it is of a nature that must dispel any apprehensions that have influenced people on the other side of the Atlantic to a belief in the unhealthful condition of the World's

The Lancet's commission finds the water supply of Chicago to be plentiful, and of a quality superior to that of most great fittles. Except in the case of unusual freshets or floors in the rivers, the water supplied to hydrants is claimed as a healthy beverage by this commission of experts. The commission, however, cautions the British public, and very wisely, against falling into the American habit of pouring ice-cold water int a heated human frame. It thinks that there will be many The Lancet's commission finds the water

metropolitan chies. It expresses an making transfers of Real Estate, the undersigned opinion that when the operations of the mession at their office during the business hours of each day, in the trustees of the sanitary district of Chicago are completed, the drainage of the city Assessors' loom, City Hall Buildwill be an object of envy to residents of other cities, and it believes that such extraordinary effor a will be made feward

traordinary effors will be made toward street-cleaning turing the World's Fair season as will make Chicago a pleasant as season as will make Chicago a pleasant as season as will make Chicago a pleasant as well as a healthful place of residence.

forth it appears that while New York has exceedingly disquieting Chicago has been actively and successfully prosecuting an extensive work of improvem

Typhoid fever, like cholera, is a disease which is chiefly contracted through the use of water containing its germs. No fact is better known than this. In 1801 there was a serious outbreak of typhoid in Chicago. Since then a new tunnel extending four miles into the lake has been completed and other means of security provided. The result is plainly disclos in the comparison of deaths, from typhold fever during the six months ending with "Col." Mcrton's wings are to be clipped. February of this year with the deaths from the same cause during the correspond ng mouths of 1891 and 1892. These are the tigures:

This progressive decrease in mortality from a formidable disease plainly tells a creditable story. The Medical News supplements these facts concerning the steady abatement of typhold with the statement are, in fact, murdered in New York every

During the week ending April 1st, the deaths from all causes in the city reached the appalling total of 1,149—a death rate of 33.2 per annum. It certainly become us to steak with great discretion and bu fact is, however, that these officials have mility of the risks which persons attending the Columbian Exposition are likely postmasters that even the New York to incur, and to undertake and prosecute Evening Its, which does not hesitate at as zealously and intelligently as possible the long-neglected and arduous task of York.

He told the officers were a part of the plunder which he secured from Mrs. Williams realized throad the 31000 to the World of valuables secured by him at the 50 the box are other pieces of property of the box are

tacked down again.

The family and intimate friends of the boy believe him to be insane. They claim he has no method in his madness beyond a feeling that to secure and secrete valuables is cunning. They say he had no object in securing money; that rather than being prodigat in its use he is inclined to be rarsimonious.

parsimonious. In fact friends feel nothing but pity for In fact friends feel nothing but rity for the misfortune which has impaired an intellect, never over strong, united with a bady of almost feminine frailness.

The police are not so charitable. They doubt the theory of insanity, and intend to let a court decide the question. They see in the two known crimes, separated by a period of three years along on which a period of three years, a long gap which may be filled with misdeeds.

# BATTLESHIPS FOR JAPAN.

Lurge Ship Builders of this Country Invited to Bid Upon Them. A Washington despatch says: Japan is about to build two new battle-ships and a she has invited bids from the large ship builders of this country as well as Europe. Navy people are watching the result with great interest, as such an invitation is novel as far as the United States is concerned, and it is the outcome of the impetus given to asyal construction in this country by the licrease of our own navy. Said a naval officer recently:

"We hardly expect that any of our people will get this contract, although our plants have been greatly enlarged and the cost of construction much reduced, yet we have not gone far enough to compete with Europe, though it is an emering wedge, and it points to what may be hoped for in the future.

"But, will we may not successfully compete for the ships, we can do so for their arranment, and it would not surprise melf we in priced that part of the contract. A few years ago it cost us, about all a gond to produce our large gous in this country, but, as we have gotten the price down to about 40 center a pound; I show in fact, I know that even Krupp cannot contract with would contract as advantage in the cost of state. A Washington despatch says: Japan

igure.

"The Krupps can make a larger gun than we have turned out yet, but expert, opinion is rapidly arraying likelf, as anat such pandwous orthogoes. We can turn such panderous orclassices. We can turn out a 18-inct 2 min and even that call we is larger than will probably be used in the future while our gans have been proved to be fully the equa of any made it the world."

# A Rumored Change.

Report has it that the recent hasty trip of Dr. A. W. Small to Waterville and Dr. Harper's visit to the Colby alumni reunion at Boston last week may have conis under consideration to affiliate all Baptist colleges in the country with Chicago Colby have been talked with on the sub-

That the benefits of such an alliance are doubtful, is the idea of those of the trustees, faculty and alumni who have expressed an opinion. Colby is nearly eighty years old while Chicago University is but two years old. They consider that Chicago University would secure a feeder and the course of study at Waterville would probably be narrowed down; and becoming distinctively a fitting school for Chiengo, Colby would almost lose its influence and standing in New England.

# Simple Rules for Judging Music.

A musical amateur, who halls from New Zealand, has framed, for the benefit of those who are ignorant of musicas few simple rules, by which they may know to what category a piece belongs; and also whether it is to be admired or not. If, he observes, it seems to be saying, "One, two, three, hop, hop, hop," or "One, two, three, hop, hop, hop," or "One, two, three, hang, bang, bang," you may conclude that you are listening to something of a very low order, which it is your duty to despise. But when you hear something that sounds as if an assorted lot of notes had been put into a barrel, and were being persistently stirred up, like a kind of harmonious gruel, you may know it's a fugue, and may safely assume an expression of profound interest.

If the notes appear to have been dropped by accident, and are fished up at irregular intervals in a sort of a drowned condition, it is likely to be a nocturne, and nocturnes, you know, are lovely. If the notes seem to come in cartionals, sach load of a different kind from the last, and if the procession of carts seem to be a long time passing any given point, it will turn out most I kely to be a symphony; and symphonics ard the grandest things that everywers. Finally, if the notes appear to be dumped out immasses, and a hovelled vigorously into heaps, and thou blown withity not the air by explosions of dwn withity not be a special to the grandes the gra aimple rules, by which they may know to

The engine for the new steamer

While much stress his been laid by certain classes of breeders and dealers on the ability of the trotter or pacer togo a single mile, the earning capacity of the harness are still determined by a more severe test, namely, that of sustaining the effort conditions. There are many progressive unfrience who believe that dash races by ill province upon large than the sustaining the effort of the conditions. There are many progressive test, namely, that of sustaining the effort of a mile that classes of breeders and dealers on the ability of the trotter or pacer togo a single mile, the earning capacity of the harness are the certain classes of breeders and dealers on the ability of the trotter or pacer togo a single mile, the earning capacity of the harness are the province and the conditions. There are many progressive test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test, namely, that of sustaining the effort of the new steamer test.

The engine for the new steamer

Rilggius.

The engine for the new steamer Awashonks, which is being built at Barbour's yard, has arrived from New Jersey. It is of the compound pattern and is a powerful one. The boilers for two of the other steamers being constructed at the yard are expected shortly, from Cambridge, Mass.

The new topic cards for the ensuing term of six months, of the First Congregational Y. P. S. C. E., will arrive the last of the week, in season for distribution next Sunday evening, it is expected. The committees for the new term have been appointed and the society is fairly started under its new officers.

Yesterday, Messrs. D. Sargent's Sons, of South Brewer, who have had some proparatory work done at their larger mill, at that end of the city, for the new band saw which is to be put in, put a larger erew on and the job of getting the mill ready and of placing the new machinery is reviewed in the real stakes, worth from 81,000 to 85,000, were

ready and of placing the new machinery in position will go on rapidly.

The mud in the city caused by the snow which came last Friday is now well dried, although there is some left in the streets yet. Out in the country, however, the roads are notice muddy and the streets in the streets yet. Out in the country, however, the roads are notice muddy and the country. ever, the roads are quite muddy and the country.

Limight be expected that a meeting as important as the one projected at Chicago

ever, the roads are quite muddy and the hauling is correspondingly bud. In some pinces the frost is coming out and this of course makes the condition worse.

At the meeting of the First Congregational Y. P. S. C. E., Sunday evening, seven new active members and three associate members were voted in. Two new ranes were also proposed for associate active in the county.

This is guite a gain and places the total membership at about 140. The society is one of the largest and most active in the county.

Miss E. M. Jones has placed a very landsome, new onk framed plate glass rirror in her millinery, establishment on Center bytest, and has been otherwise improving the interior of her store, which, with her large and bequifful stock of spring goods, will present a beautiful sight at her opening, which occurs Wednesday and Thursday.

Mr. Benjamin Kingsbury, the newly appointed postmaster at South Brewer, has not/decided when he will take charge of the office. The present incumbent, postmaster C. F. Nickerson, is ready to retire at any time, but it seems quite likely that the charge will not be made till the entage of any time, but it seems quite likely that the charge will not be made till the entage of any time, but it seems quite likely that the charge will not be made till the entage of any time, but it seems quite likely that the charge will not be made till the entage of the first of any time, but it seems quite likely that the charge will not be made till the first of any time, but it seems quite likely that the charge will not be made till the first of any time, but it seems quite likely that the refore more convenient in

that the change will not be made ill the first of July, that being the first of July, that being the first of a new quarter and therefore more convenient in

many respects. The ice is no longer sale to cross on and the sign "dangerous" has been placed at Hood's Sarsaparilla will make you free atrong and well, and give you a hearty the ferry way. A few people continued to cross, but it was a foolhardy proceeding, as the condition which the sun and warm winds of the past few days has brought the ice to is one of small security from accidents. One man broke through on the river yesterday, as is more fully reported elsewhere in this morning's issue, and had a very narrow escape from death by drowning. The bridge is the only safe way to cross antil the ice goes. Buy them new; they will soon be gone.

brought the ice to is one of small security from accidents. One man broke through on the river yesterday, as is more fully reported claewhere in this morning's issue, and had a very narrow escape from death by drowning. The bridge is the only safe way to cross until the ice goes.

The Junior Endeavor society of the first Congregational church is in a flourishing condition and has done most ox cellent work under the efficient superture adent, Miss Frances R. Upton, during the term just closed. During the last few weeks seventeen new members have been weeks seventeen new members have been added to the organization, which now no mobers, all told, about eighty. The society holds bi-weekly meetings on Sin.

"Favorite Prescription" is unequaled. Guranteed to give satisfaction or price from the members. Very interesting meetings are held. It has done tonsider— EPPS'S COCOA teadent, Miss Frances R. Upton, during the term just closed. During the last few

the term just closed. During the last few suffers no pain at any time, and her geuweeks seventeen new members have been added to the organization, which now an observable of the organization, which now an observable in the leaders are saken in nbers, all told, about eighty. The society holds bi-weekly meetings on Sunday afternoons and the leaders are saken from the members. Very interesting meetings are held. It has done considerable missionary work and in many ways has done much good.

In the City Hall, last evening, the whist club held its private dancing pary, and a very pleasant event it was. In the neighborhood of forty or fifty couples were present and a well arranged programme of fourteen dances was carried out and thorfour teen dances was carried out and thoroughly enloyed. Four pieces of Pullen's orchestra, of Bangor, furnished music sud the gentlemen members of the whist club, ten in all, seted as floor managers. Afreshments, which added, much to the event, were served by caterer M.E. Maling. The attendance included buth Brewer and. Bangor young people and all declared the occasion a delightful and successful one..... Hood's Pills are purely vegetable, and do not purge, pain or gripe. Sold by all druggists.

The plan of fire last evening was occasioned by the burning of an undespited and ondulated house on Elm street. In South Brewer, called the Joseph Miller, ilse. It was a tory and a plat structure and was nearly burned at before the fire-was nearly burned at before the fire-was nearly burned flat before the fire-was nearly burned flat before the fire-was nearly burned flat before the loss will be small! No one had lived in the house for some time and the fire-was one do it tedly at incending origin.

# OASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregorie, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrheea and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea-the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children." Da. G. C. Osgood

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not ar listent when mothers will consider the real est of their children, and use Casteria in nterest of their children, and use Castoria in-steed of the various quark nestrums which are legitoring their leved ones, by forcing colum, morphine, soothing syrup and other burtful agents down their threats, thereby sending their to premature graves."
